HOW TO BRICK UP AN OPENING

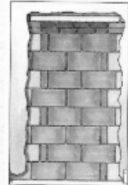

STEP 1: Cut back the plaster
about 150mm all around the
opening.

STEP 2: To bond the new
brickwork into the old, cut out
a half-brick on each side of the
opening at every fourth course.

STEP 3: Lay bricks in mortar
following the original courses

STEP 4: When the mortar has
set, spread on a base-coat of
plaster, followed by a finishing
top coat of paint.

STEP 5: Fit two complete
lengths of skirting.
